

MOM GPS upgrade with uSD card

Make the upgrade uSD card.

(Operation on Windows XP)

1. Download the Phoenix card tool from http://tom.linux-sunxi.org/mom/PhoenixCardV306_2012_03_02.zip
2. The latest firmware from http://tom.linux-sunxi.org/mom/sun4i_crane_gps_2012_11_10.img.tar.gz
3. Prepare uSD card and card reader, connect card reader to pc
4. Unzip phoenix card and run PhoenixCard.exe

Warning: the content of uSD card will be earsed.

5. The burning process as below

Once the process ends, you will get one upgrade uSD card for the gps. I suggest preparing multiple uSD cards if upgrading a lot of devices.

Upgrade GPS with uSD card

1. make sure gps is powered off and has enough battery if not, a power adapter is needed.
2. Plug in the upgrade uSD card to GPS uSD slot, and press the power button or plug in the power adapter to power on the device
3. The upgrading process begins
4. Once finish, the GPS will be powered off. Be sure **remove the uSD card first** and power on the GPS then, or you will upgrade again.
5. The upgrade uSD card can be used many times on many devices.
